

## HOMEOWNER WILDFIRE ACTION PLAN

YES	NO	
		Dense stands of pine trees have been thinned. Limbs and other debris have been
		removed from property and disposed of properly.
		Lower tree branches have been removed up to head height.
		Pine needles, leaves and other surface fuels are cleaned up regularly and disposed of properly.
		Grass and weeds are mowed short.
		Firewood, hay bales, and other flammable materials are uphill and at least 30 feet from structures.
		Area under decks is free from flammable materials.
		Roof is made of non-combustible material.
		Foundation and eave screens are in good repair.
		Gutters and roof are free of pine needles, leaves and accumulated debris.
		There are no branches overhanging within 15 vertical feet of the roof or chimney.
		Spark arrestors are installed on chimney flues, small engines and other equipment.
		Wood burning appliances are inspected by a professional annually and cleaned at intervals recommended during inspection.
		Fireplace ashes and BBQ briquettes are stored in a covered metal container for 2 days before water is mixed in and material is disposed of.
		Name and address are clearly visible from street.
		Driveway width and clearance is adequate for emergency vehicle access and turning.
		Nearby fire hydrants are cleared of vegetation and debris.
		Smoke detectors are installed and tested monthly. Batteries are replaced twice each year.
		The family has an escape plan and everyone has practiced it.
